PROJECTS

PAYROLL MANAGEMENT SYSTEM (INDUSTRY PRACTICE)

Jan 2019 - July 2019

- Front-end of the system has been designed using JavaScript framework VueJS.
- It is a reliable user-friendly payroll system that will help employees to compute accurately their salary.
- Payroll system is able to rapidly process payroll computation.

BLOG MANAGEMENT APP

- New users could create their account, post their content and can delete or update their own content.
- Users can also comment on their or somebody else's blogs and can delete their comments.
- User's dashboard shows all the blogs by other users and user can see what others have written about.
- HTML, Bootstrap, JavaScript, React, Flask, MySQL were used.

SUDOKU GAME

- Every time user launches the game a new Sudoku grid is given to solve.
- New grid is generated with the help of a Sudoku generator algorithm.
- When user submits the game the app tells if user has won/lost and also shows the Sudoku's solution.
- Sudoku solver algorithm is used to output the Sudoku's solution
- HTML5, CSS3, JavaScript were used.
